### THE SUMMER QUARTER

1917

THE Summer Quarter at the University of Chicago is the most largely attended of the year, more than five thousand students having registered in the summer of 1916. The University year is divided into quarters: the Autumn, Winter, Spring, and Summer. In 1917 the Summer Quarter will begin June 18 and close August 31. The First Term will begin June 18; the Second Term, July 26. Students may register for either Term or for both. Students entering at the beginning of the Second Term may register for courses for which they have had the prerequisites. The courses during the Summer Quarter are the same in character, method, and credit value as in other quarters of the year.

A large proportion of the regular Faculty of the University, which numbers over three hundred, and also many instructors from other institutions, offer courses in the Summer Quarter, and in this way many varied points of view are given to students in their chosen fields of study.

### ARTS, LITERATURE, AND SCIENCE

The University offers during this quarter, in the Schools of Art, Literature, and Science, both graduate and undergraduate courses in Philosophy, Psychology, and Education; Political Economy, Political Science, History, Sociology and Anthropology, and Household Administration; Semitics and Biblical Greek; Comparative Religion; History of Art, Sanskrit, Greek, and Latin; Modern Languages; Mathematics, Astronomy, Physics, and Chemistry; Geology and Geography; Botany, Zoölogy, Physiology, Physiological Chemistry and Pharmacology, Anatomy, Pathology, Hygiene and Bacteriology; and Public Speaking.

## THE PROFESSIONAL SCHOOLS

### *Divinity*

The Divinity School is open to students of all denominations, and the instruction is intended for ministers, missionaries, theological students, Christian teachers, and others intending to take up some kind of religious work. The English Theological Seminary, which is intended for those without college degrees, is in session only during the Summer Quarter. The Graduate Divinity School is designed for college graduates. Pastors, theological teachers, students in other seminaries, candidates for the ministry, and other Christian workers, with requisite training, are admitted in the Summer Quarter.

The Chicago Theological Seminary will also be in session during the Summer Quarter, and its courses are open on the same conditions as those that obtain in the Divinity School.

### *Law*

In the work of the Law School the method of instruction employed—the study and discussion of cases—is designed to give an effective knowledge of legal principles, and to develop the power of independent legal reasoning. The three-year course of study offered constitutes a thorough preparation for the practice of law in any English-speaking jurisdiction. By means of the quarter system students may be graduated in two and one-fourth calendar years. Regular courses of instruction counting toward a degree are continued through the Summer Quarter. The courses are so arranged that students may take one, two, or three quarters in succession in the summer only before continuing in the following Autumn Quarter. The summer work offers particular advantages to teachers, to students who wish to do extra work, and to practitioners who desire to study special subjects.

### *Medicine*

Courses in Medicine constituting the first two years of the four-year course in medicine in Rush Medical College are given at the University of Chicago. For the majority of students taking up medical work for the first time, it is of decided advantage to enter with the Spring or Autumn Quarter. For the student who is lacking in any of the admission courses, or who seeks advanced standing, it is of especial advantage to enter for the Summer Quarter. All the courses offered are open to practitioners

of medicine, who may matriculate as unclassified or as graduate students. Practitioners taking this work may attend the clinics at Rush Medical College without charge.

## *Education*

In the Professional Schools the Graduate Department of Education in the School of Education gives advanced courses in Principles and Theory of Education, Educational Psychology, the Psychology of Retarded and Subnormal Children, History of Education, and Social and Administrative Aspects of Education. The College of Education is a regular college of the University, with all University privileges, and in addition provides the professional training of elementary- and secondary-school teachers and supervisors. It offers undergraduate courses in professional subjects and in the methods of arranging and presenting the various subject-matters which are taken up in the elementary and secondary schools. The University High School, with the fully equipped shops of the Manual Training Department, is in session during the Summer Quarter, and opportunity is offered to take beginning courses in Latin and to review courses in Mathematics and History. The regular shop work, supplemented by discussions of methods, is open to teachers pursuing these courses.

## *Commerce and Administration*

The School of Commerce and Administration is an undergraduate-graduate professional school, offering courses arranged to meet the needs of those preparing for various business pursuits, for commercial teaching, for secretarial work, and for philanthropic service. The work for the summer of 1917 will be organized, in co-operation with the School of Education, with especial reference to the needs of commercial teachers. In all the curricula emphasis is placed upon (1) broad foundations of work in history, political economy, sociology, psychology, biology, government and law; (2) an individualized curriculum; (3) contact with practical affairs; and (4) a professional spirit.

---

The University of Chicago is peculiarly fortunate in its environment in summer. The city of Chicago is relatively cool. High temperatures are not frequent or long continued, and the normal temperature, in comparison with that of other large cities, is low. Reports of the United

---

# *The University of Chicago*

---

States Weather Bureau show that the average summer temperature of Chicago is lower than that of most cities of its class. In addition to this advantage in weather conditions, the University has an especially favorable situation in the city. To the south stretches the Midway Plaisance, an avenue of lawn a block wide and a mile long; and about equidistant are Washington Park, a large recreation ground on the west, and Jackson Park, equally spacious, on the shore of Lake Michigan, to the east.

Opportunities for diversion are numerous. In Jackson Park there are golf links, and in both Jackson and Washington parks, lagoons for rowing. There are many tennis courts in both parks, along the Midway, and on the campus. Through the Frank Dickinson Bartlett Gymnasium full facilities for physical culture are given to men. The Reynolds Club offers social privileges to men. Similar opportunities for women are offered in the gymnasium, swimming pool, and clubrooms of the new Ida Noyes Hall. Many social clubs are organized among students. The Dames Club of the University of Chicago, composed of wives and mothers of students, meets every second and fourth Saturday of the month. The place of meeting will be announced in the *Weekly Calendar*.

Notable public libraries and museums, highly organized industrial plants, many typical foreign colonies, a large number of settlements, and other significant social institutions make Chicago a peculiarly appropriate center for study and investigation.

A series of public lectures in Literature, History, Sociology, Science, Art, Music, etc., scheduled at late afternoon and evening hours throughout the Summer Quarter, affords an opportunity to students and other members of the University community to hear speakers of authority and distinction in many departments of study and activity. This program will include a number of popular readings and recitals, open-air performances, concerts, and excursions to places and institutions of interest in and near Chicago.

The complete ANNOUNCEMENT of courses for the Summer Quarter of 1917 will be sent on application to

# THE ORIGIN AND GROWTH OF THE HEBREW RELIGION

**By HENRY THATCHER FOWLER**  
*Brown University*

This textbook presents the fascinating story of the genesis of Israel's religion and its long, steady development to the religious idealism of Isaiah, Ezekiel, and Jeremiah. It is so interesting that college students, church classes of adults and young people, and Y.M.C.A. and Y.W.C.A. groups alike will be inspired by it and will delight in studying it.

## BALOPTICON

### THE PERFECT STEREOPTICON

a short-cut to the eye.

Many progressive educational institutions are taking advantage of these facts and employing the sharp, brilliant images of the Balopticon as an aid to teaching.

The latest improvement in the Balopticon is the adaptation of the gas-filled Mazda lamp which, though using much less current than the old-style A. C. arc, furnishes more evenly distributed light and greatly simplifies operation.

The New Combined Model projects either slides or opaque objects (maps, photos, specimens, etc.), interchange between both forms being instant. This model \$120. Models for slides only, \$25 up. For opaque objects \$35 up.
